

KINGFISHER DIRECT LTD

EPDM Tank Lining

Colour	Matt Black
Abrasion resistance	Excellent
Chemical resistance	Good
Cut through resistance	Excellent
Flexibility	Very Flexible
Temperature resistance	Very Good
UV Resistance	Excellent
Repair with....	Glue & patch

Advantages:

- Totally inert with no problem with leaching of plasticizers as suffered with PVC liners
- Completely UV and Ozone resistance
- Brittle point at -40 deg C
- Does not harden and crack when continually flexed
- Flexibility makes this liner very quick and easy to install
- Easily and quickly repairable with glue and repair patch
- Life expectancy of 10+ years

Disadvantages:

- More expensive than equivalent thickness PVC or FPP liners
- Not suitable for drinking water applications
- Heavier than PVC or FPP liners but packs smaller
