

Wyatt Cycle Rack

Product Code: WYWYCY

The stylish Wyatt cycle rack uses both Iroko hardwood and galvanised steel to give it a contemporary appearance that is suitable for use in schools, colleges, universities, city centres, parks and green spaces and it gives the public a secure location to leave their bike.

The Wyatt cycle rack is available in a choice of three sizes, from a single unit to a triple unit and features tube and flat bar combined with a wooden cross bar.

The Wyatt cycle rack has the option of being ground fixed using a fixing plate and RAWL bolts or it can be spike fixed which means the cycle rack is extended by 300mm to allow for fixing directly into the ground with spikes to secure it into concrete.
