

# Large Capacity Dog Waste Bin With Chute

Product code: WYB-WBD-112

Capacity	112 Litres
Depth	483mm
Width	483mm
Height	1003mm

The WDB112 dog waste bin is ideal for busy public parks and green spaces as it features a large capacity and gives dog walkers a designated bin to dispose of their dog's waste.

Glass Fibre Composite (GFC) is ideally suited to the manufacture of street furniture as it is extremely strong and durable and is unaffected by extreme temperatures. Another benefit of GFC construction is that they can be located close to the sea as they are unaffected by salt water and therefore will not corrode. With 65% of its construction coming from renewable sources, it is also environmentally friendly.

The bin features an integrated one-way chute system that directs waste into the galvanised steel liner below, and a lockable front opening door allows quick and easy access for emptying. A moulded 'DOG WASTE' plate on the front of the bin clearly shows the waste stream.

## Finishes & Colours

**Textured Finish** - Uses PTX textured paint to give a rough finish not too dissimilar to sand paper and is designed to prevent unwanted graffiti and posters being applied to the bin.

**Smooth Finish** - Uses a smoother pseudo-cast iron finish with only a slight texture and no roughness.

**Victoriana Finish** - Uses the smooth finish with only a slight texture and no roughness with the addition of highlighted beading to give a classic Victorian style appearance.
