

Hooded Top Recycling Bin

Product Code: BSWYWGP3

The Hooded Top Recycling Bin is manufactured from tough and durable medium density polyethylene and is available in a wide choice of colours. The bin is suitable for both indoor and outdoor use and because of the polyethylene construction the bin will not fade in colour if exposed to sunlight for long periods. Polyethylene will never rust or corrode so the bin is guaranteed a long life time.

The bin is available with a choice of three apertures to suit different waste streams and a range of optional WRAP art work is available for different recyclable materials (as shown in the image). The art work is A4 (210 x 297mm) size and is applied to the front of the bin to make the waste stream you are collecting visible from afar.

As standard the bin is supplied with no liner, however an optional galvanised steel liner is available. The top of the bin is removable to allow quick and easy emptying and an optional lock is available to secure the top of the bin to the base.

The bin can be free standing, have a concrete slab inserted in the base or it can be bolted down using the optional set of 4 RAWL bolts.

Colour & Aperture Options

Black

Light Blue

Dark Blue

Red

Grey

Light Green

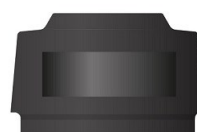

Dark Green

Yellow

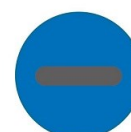

Orange

Standard Aperture

Circular Aperture

Slot Aperture

Please note the above colours offer an approximation only and should not be used as an exact match

Optional Extras

Galvanised Liner

Add a circular galvanised steel liner to collect the waste and make emptying much easier. Handles on the inside allow the liner to be lifted easily.

Lock

A twist-off locking lid can be added so access can only be gained by authorised personnel.

RAWL Bolts

Set of 4 RAWL bolts for ground fixing.

A concrete ballast is also available to weight the bin down.

Recycling Artwork

A4 (210 x297mm) artwork positioned on the front of the unit to make the waste stream stand out.
