

Console Recycling Unit

The Console is a three compartment recycling unit that features a stylish design and is suitable for a wide range of locations such as shopping centres, schools, colleges and in the workplace.

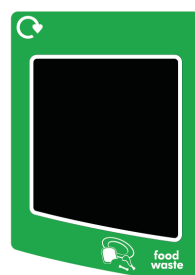

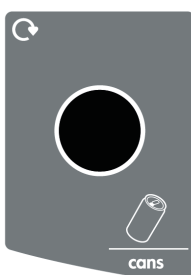

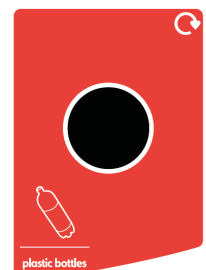

The unit is manufactured from 2mm galvanised steel making it very tough and durable and a key feature of the unit is the dual hinged doors with invisible magnetic door catches. This system allows quick and easy access to the liners inside the bin and makes emptying quick and easy.

A wide range of WRAP iconography fascias are available to suit your recycling requirements. The fascias are attached to the top of the unit and clearly indicate what is being collected in the bin.

We also offer a full range of waste recycling artwork to match your fascia choices. The artwork is applied to the front of the bin and clearly indicates which waste stream is being collected.

Fascia Options

The Console units have a wide range of fascia plates available featuring WRAP artwork, iconography and colours with apertures to match. All fascia plates are available as left hand, right hand and central plates.

***More fascia plates
are available than
those shown**

Artwork

A4 (210 x 297mm) vinyl stickers positioned on the front of the body to make your waste stream visible.

Optional Extras

Liners on Castors*

Castors are added to liners to aid manoeuvrability.

*This option is available upon request only

Lift-up Aperture Flap*

The lift-up flaps provide better fire protection and helps keep unpleasant smells inside the bin.

Ideal for the collection of food waste.

*The flaps are priced individually and are only available upon request
