

WH20

50mm (2 inch) High Pressure Water Pump

Durable yet lightweight

High quality tubular steel frame and aluminium pump housing ensure easy portability with long life.

OHV 4-stroke engine

Powerful and efficient with trusted reliability. Easy starting in all conditions with automatic decompression to reduce the pull-force needed.

Excellent performance

The WH20 offers exceptional high pressure performance with lower flow, ideal for sprinkling, jetting, long-hose irrigation or fire fighting applications.

Quick-release couplers

Quick and simple to install the hoses with no tools necessary.

Cast iron volute and impeller

Superior durability for long life performance, even when pumping abrasive silts and sand.

Oil Alert®

Prevents engine damage by automatically shutting the unit down if the oil drops below a safe operating level.

The WH20 offers exceptional high pressure performance with lower flow, ideal for sprinkling, jetting, long-hose irrigation or fire fighting applications. The combination of a powerful 4-stroke engine and larger diameter impeller means it is capable of producing 5 bars of pressure with up to 50m headlift. The pump features a lightweight, corrosion-resistant aluminium body, durable cast iron volute and impeller and a carbon ceramic mechanical seal. A quality welded tubular steel frame provides added durability with easy carrying. Add to this the super reliable, easy starting engine and tool-free hose couplings and you've got a pump that allows you to concentrate on the job in hand.
