

# Product Assembly & Safe Use Instructions

## Product: KDC Portable Store

This information sheet should be passed to the user/operator of this product before operation to ensure the product is used properly.

### Always:

1. Ensure the store is assembled on level/flat ground for best results. This avoids bending of the chassis & complications with aligning the panel.
2. Hand tighten nuts & bolts first to ensure correct alignment prior to tightening with the socket spanner.
3. Ensure minimum of 2 people carry out the assembly of this product.
4. Lift the product empty.

### Never:

1. Attempt to assemble this product during high winds or adverse weather.
2. Walk over any of the panels during assembly as this might cause bending & deformation meaning that panels may not align correctly.
3. Stack this product after full assembly.
4. Lift the product unless it is completely empty & damage free.
5. Fully tighten components until completely aligned & fully located, this can cause damage and deformation if fully tightened prematurely.

### Storage:

All components & panels are galvanised and powder coated prior during the manufacturing process, however components should not be left outside longer than necessary.

### Note:

**ALWAYS** ensure that at least 2 people carry out the assembly of these stores. **NEVER** attempt to lift or move any of the panels without help to do so. Ensure hands are free from crushing prior to letting panels go.

Safetrade 247 operates a policy of continual improvement with regard to our products & services. Should you or your organisation have any comments/observations, which you deem would be beneficial to our company, please do not hesitate to inform us.

# SAFETRADE 247

A DIVISION OF SAFELIFT OFFSHORE LTD

## Contents:

1. Floor panel x 1
2. Wall panels x 2
3. Rear panel x 1
4. Door panel x 1
5. Roof panel x 1,
6. Fixing & fastening, pack x 1
7. Lock cylinders x 2
8. Key sets x 3

## Assembly Guide:

1

The store arrives flat-packed, securely at your destination. Remove all shipping bolts and packaging.

2

Position floor panel (1) in a suitably prepared, level area & ensure that the short end is facing the correct direction for the door.

3

Place the door panel (4) onto the floor and secure using bolts & washers by hand to the floor. **Tip: An open door will hold the panel up.**

4

Place the first wall panel (2) onto the floor & secure using bolts & washers by hand to the floor.

5

The wall panel (2) should be inter-locked with the door panel (4) at the corner then should be secured using bolts & washers by hand.

6

Place the rear panel (3) onto the floor & secure using bolts & washers by hand to the floor.

7

Repeat steps 4 & 5 which completes the last side of the store. Secure using bolts & washers by hand.

8

Lift the roof panel (5) and rest against the door panel (4). **Tip: This makes lifting the roof panel into position easier.**

9

Lift and slide the roof panel (5) onto the roof of the store, ensuring the roof panel (5) locks into position all the way around the sides & rear.

10

Secure the roof panel (5) to the side panels (2), rear panel (3) & door panel (4) using bolts & washers by hand. **Tip: Move to align holes.**

11

Place both lock barrels into the holes locking with screw provided. **Tip: Ensure the thumb lock is located inside the store.**

12

Now that the store is assembled, using a socket spanner tighten all nuts and bolts that have been hand tightened only. Enjoy!
