

Protection Bollard

Adding strength and presence to corners and structures

Features and Benefits

- Highly durable plastic for long lasting protection
- Flexes on impact and reforms shape
- Variety of highly visible colours available
- Use in temperatures as low as -40°C

Description

Low maintenance High Density Polyethylene (HDPE) plastic bollards only need replacing when frequent, major impact has occurred.

Unlike metal bollards, there is minimal floor damage when impact occurs, saving maintenance costs long term.

Available in a range of striking, high visibility colours that are easily detectable, preventing accidents before they happen.

Fully recyclable and non-toxic. Suitable for use in food production facilities and freezer environments.
