

FloodBuddy

Emergency Submersible Dewatering Set

The FloodBuddy is an emergency submersible dewatering kit, consisting of a stainless steel pump with built-in level switch, mounting bracket, 10m pump cable and 10m of lay flat hose with quick release couplings.

The mounting bracket supports the pump, ensuring it stays stable and vertical when in use.

Features

- Stainless steel pump with built-in level switch.
- Integrated check valve built into the pump.
- Stainless Steel mounting bracket kit.
- 10m power cable (complete with suitably rated plug, on request)
- 10m hose with quick release coupling set.
- Transport box with holes as protection against coarse solids.
- Pump can be used outside of the box.
- Other pump models available.

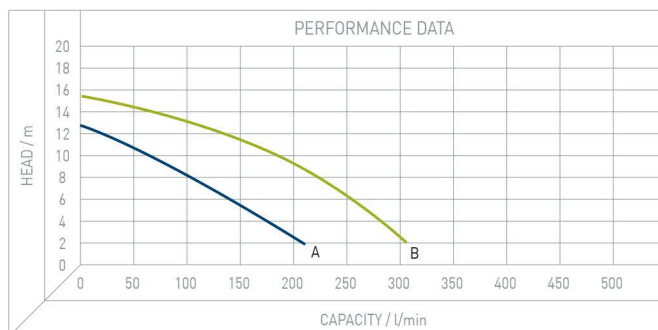

Applications

Suitable for Emergency flooding situations:

- Basements/Cellars
- Residential properties
- Garages
- Commercial premises
- Gardens
- Areas liable to flooding
