

Kingfisher

Direct Ltd

Capacity (Litres)	82
Construction Material	Timber
Height (mm)	760
Diameter (mm)	637

The Warden is a premium look litter bin designed for use in a wide variety of locations. The bin is manufactured using pressure treated half round timber slats mounted on a galvanised steel frame.

The bins appearance makes it ideal for parks and green spaces, golf clubs, nature and wildlife parks as it subtly blends in with the surroundings.

The bin is supplied with a lift out galvanised steel liner and features fast lock security as standard.

A cast aluminium 'LITTER' sign mounted on the bin makes the bin easily identifiable.
