Direct Ltd

Capacity (Litres)	90
Construction Material	Iroko Hardwood
Height (mm)	900
Diameter (mm)	560

The Winchester is a premium timber litter bin ideal for use in parks and green spaces as its appearance lets it blend in naturally with the surrounding area.

The bin is manufactured from Iroko hardwood, which is used as it is extremely tough and hard wearing, offers excellent stain resistance and requires very little maintenance. The bin is finished in Sikken's teak and wax. A fully galvanised internal metal frame adds strength.

The unit features a front opening hinged door giving quick access to the galvanised liner inside, therefore making emptying the bin a quick and easy task. Standard slam shut lock system utilising 'T' bar key.
