

# User guidelines

## Recycling bins

### Envirobin

**Cleaning** Products should be flushed with clean water and then washed with a mild detergent solution using a bristle brush or sponge. Care should be taken not to apply undue pressure that may damage labels. Flush clean with water after washing.

**Manufacturing Standard** (as applicable)  
All products are manufactured to BS EN ISO 9002.  
Plastic materials: Mechanical properties tested to BS 2782 Hot dipped galvanized: BS 729  
Powder coating: BS 3900 Zinc coating: BS 1706

**Tools** None

**PPE** Always wear appropriate PPE equipment and follow safety guidelines

#### Removing hood and liner

1 Grip the rim lifting it up and off the lip of the bin base

2 Lift rim upward clearing the bin base and place to one side

3 Gather liner from top of bin, lift up and empty

## Replacing liner and hood

4 Replace clean liner into bin and stretch over top rim

5 Replace hood. If the hood contains any labeling ensure it is facing the correct direction and lines up with the recycle 'swoosh' or personalisation label

6 Ensure the hood is sitting at its lowest position

## Additional variation: Split liner

1 The envirobin can be supplied with a split liner, the metal divider and cut groove allows the bin to be fitted with two sack liners

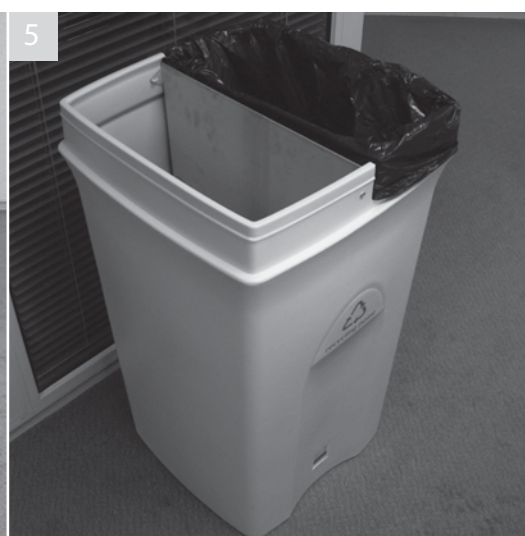

2 Remove hood and release one liner at a time removing from central groove and around bin lip. Gather liner, remove from bin and empty

3 Replace liners inserting the liner edge into the cut groove first

4 Stretch a liner over each side of the bin

5 Ensure the liners are tidy at the top of the bin

6 Replace bin hood locating the front to back split in the liner with the cut grooves on the underside of the lid
