

Rattan Effect 150 Litre Poly Water Butt Kit

Specification	
Capacity - Litres	150
Capacity - Gallons	32
Diameter - mm	520
Height - mm	970
Construction Material	Polyethylene
Code	DWTPTRATTAN

Description

This 150 Litre poly butt with a rattan effect creates a stylish design, available in two colours to fully complement any garden. The water butt is manufactured from fully UV stabilised LLDPE (linear low density polyethylene) meaning the product will not degrade over time and will retain its strength for 10 – 15 years.

The kit includes everything you need to start collecting and storing rainwater to be used for activities such as watering plants. The water butt comes with 2 pre-drilled holes for the tap, giving you an option of the height you want the tap, depending on whether the durable stand is being used. There are also 2 pre-drilled holes for the rainwater diverter, giving you an option of how you would like to display your water butt. The holes not in use can be filled with caps that are included in the kit. The rain diverter allows water to filter into the water butt and stop overflowing by continuing the water-flow down the drainpipe if the water butt and connector are full.

Features

- Rattan effect
- Pre-drilled to make installation of the tap and rain diverter easier
- Option of tap height
- Low maintenance
- UV protected
- Height: 970mm
- Diameter: 520mm

Included in the Kit

- Hose connector tap
- Durable matching stand
- Rain diverter
- Child safety lid

Delivery: 2 – 3 working days.
