

Timber Fronted Dog Waste Bin

Product code: WB-WDB-7D

Capacity	91 Litres
Depth	432mm
Width	457mm
Height	914mm
Weight	42 kg

Designed for use in parks and green spaces, the timber fronted dog waste bin gives dog walkers a designated bin to dispose of their dog waste. The bin features an attractive design that looks great and blends into the surrounding area.

The body of the bin is manufactured from glass fibre composite (GFC) with a GFC one way chute system and is available with either a textured or smooth finish. The textured finish has been designed to help eliminate unwanted posters and graffiti being applied to the bin and the smooth finish offers an attractive yet cost effective alternative.

The timber front of the bin is stained in either light or dark oak finish and a galvanised steel liner is integrated into the front panel section. The bin can be emptied easily by unlocking and sliding out the timber fronted liner.

Only PEFC accredited timber is used in the construction of this bin. This allows the environmental impact of using timber products to be kept to a minimum by only using timber sourced from PEFC accredited sources. PEFC has become the world's largest forest certification umbrella organisation with over 30 independent natural schemes.

Finishes & Colours

Textured Finish - Uses PTX textured paint to give a rough finish not too dissimilar to sand paper and is designed to prevent unwanted graffiti and posters being applied to the bin.

Smooth Finish - Uses a smoother pseudo-cast iron finish with only a slight texture and no roughness.
