Weight: 25 kg

Product Code: WYVFB2

Dimensions:

Height: 737mm
Width: 457mm
Depth: 457mm
Capacity: 112 Litres
Weight: 30 kg

Manufactured from Glass Reinforced Plastic (GRP), these open top litter bins feature an elegant fluted appearance with a Victoriana theme that makes the bins suitable for heritage sites and traditional looking areas. GRP is used in the construction of the bin as it ensures high impact protection and excellent corrosion resistance.

The bins are supplied with a lift out galvanized steel liner with fold down handles which makes it easier to empty when full. For added security, an optional lockable liner is available. A 'LITTER' plate highlighted in gold is applied to the front and back of the bin.
