

GFC Hexagonal Open Top Litter Bin

Product Code: WYLBV14

Height	787mm
Width	533mm
Depth	533mm
Capacity	84 Litres
Weight	28 kg

The GFC open top hexagonal litter bin is a popular choice in coastal areas as Glass Fibre Composite (GFC) is unaffected by extreme temperatures or salt water so will therefore not corrode if located next to the sea. With 65% of its construction coming from renewable sources, it is also environmentally friendly.

The bin is supplied with a lift out hexagonal galvanised steel liner and a Tidyman plate is fitted to the front and back of the bin.

The GFC litter bins are available with a choice of either a textured, smooth or Victoriana finish. The textured finish uses PTX textured paint to give a rough finish not too dissimilar to sandpaper and is designed to prevent unwanted graffiti and posters being applied to the bin. The smooth finish uses a smoother pseudo-cast iron finish with only a slight texture and no roughness.

The Victoriana finishes uses the smooth finish with only a slight texture and no roughness with the addition of highlighted beading as standard to give a classic Victorian appearance. The Victoriana finish is a popular choice for heritage sites and town centres.

Finishes & Colours

Textured Finish - Uses PTX textured paint to give a rough finish not too dissimilar to sand paper and designed to prevent unwanted graffiti and posters being applied to the bin.

Smooth Finish - Uses a smoother pseudo-cast iron finish with only a slight texture and no roughness.

Victoriana Finish - Uses the smooth finish with only a slight texture and no roughness with the addition of highlighted beading to give a classic Victorian style appearance. The Victoriana finish is a popular choice for heritage sites and town centres.

Textured Colours

Smooth Colours

British Racing Green

Dark Blue

Green

Please note these colours offer an approximation only and should not be used as an exact match.

Ground Fixing Options

Set of 4 RAWL Bolts

The Middlesbrough litter bins are supplied with a pre-drilled base allowing secure ground fixing using RAWL bolts.

Ground Anchor Feet

Ground Anchor Feet enable a bin to be sited into freshly laid concrete. The feet are supplied loose with the bin and bolt to the bottom of a bin. Once the concrete cures the bin is secured in place.

Concrete Base*

A concrete slab is either bolted to the base of the bin or fitted inside. This concrete slab weights the bin down and is ideal for areas where ground fixing is not an option.

*Price varies depending on model of bin. Please contact us to discuss.
