

GFC Semi Open Top Litter Bin

Product Code: BS-WY-LBV7

The GFC Semi Open Top Litter Bin is a popular choice in coastal areas as Glass Fibre Composite (GFC) is unaffected by extreme temperature changes or by salt water so will therefore not corrode when located close to the sea. It is also environmentally friendly with 65% of its construction coming from renewable sources.

The bin is available with a choice of either a textured, smooth or Victoriana finish. The textured finish uses PTX textured paint to give a rough finish not too dissimilar to sand paper and has been designed to prevent unwanted posters and graffiti being applied to the bin. The smooth finish uses a smoother pseudo-cast iron finish with only a slight texture and no roughness.

The Victoriana finish uses the smooth finish with only a slight texture and no roughness with the addition of highlighted beading as standard to give a classic Victorian style appearance. The Victoriana finish is a popular choice with heritage sites and town/city centres.

The bin features a hinged door fitted with a slam lock which is easily opened using a square T key and closes with a push of the door against a spring loaded boss. Two large apertures make the bin ideal for busy locations such as sea front promenades, high streets, parks and green spaces.

Height	838mm
Width	533mm
Depth	533mm
Capacity	112 Litres
Weight	35 kg

Finishes & Colours

Textured Finish - Uses PTX textured paint to give a rough finish not too dissimilar to sand paper and designed to prevent unwanted graffiti and posters being applied to the bin.

Smooth Finish - Uses a smoother pseudo-cast iron finish with only a slight texture and no roughness.

Smoking Options

Stainless Steel Stubber Plate

Designed to encourage smokers to use it to stub out their cigarettes and cigars instead of using the bin and leaving unsightly marks on it.

Ground Fixing Options

Set of 4 RAWL Bolts

The Middlesbrough litter bins are supplied with a pre-drilled base allowing secure ground fixing using RAWL bolts.

Ground Anchor Feet

Ground Anchor Feet enable a bin to be sited into freshly laid concrete. The feet are supplied loose with the bin and bolt to the bottom of a bin. Once the concrete cures the bin is secured in place.

Concrete Base*

A concrete slab is either bolted to the base of the bin or fitted inside. This concrete slab weights the bin down and is ideal for areas where ground fixing is not an option.

*Price varies depending on model of bin. Please contact us to discuss.
