

Barnsley Litter Bins

The Barnsley litter bins are among our best selling bins and they are widely used throughout the United Kingdom. They are a popular choice with Councils and local authorities, as they all like the durability, usability and customisation offered by the bin.

The Barnsley range is made up of two models, the standard Barnsley litter bin and the Barnsley Mark 2.

Barnsley

Barnsley Mark 2

The Barnsley litter bins are fabricated using 2mm galvanised steel with an 8mm galvanised base welded to the walls to make a very strong, rigid and durable container. The whole unit is powder coated in one of our standard colours with the option of adding gold or silver banding available. If you require a colour that is not among our standard colours, please contact us, as more colours are available upon request.

The bins have a smooth surface as standard and each bin is supplied with a vinyl word to both the front and back of the unit free of charge. Please select the text you require from the text and artwork option above. The option to upgrade to laser cut text is available and this includes either a gold or silver backing plate. The text is positioned underneath the apertures and is available in either English or Welsh.

The bins feature large pizza box sized apertures (Please note the image only shows two, however up to four can be specified 2) and a capacity of 112 litres makes the bin suitable for use in busy areas such as schools, colleges, universities, high streets, parks and green spaces. Internal litter deflectors ensure all rubbish goes inside the liner.

An important feature of the Barnsley litter bin is the slam lock fitted to the door. This is a stainless steel lock which is easily opened with a square T key and closes with a push of the door against a spring loaded boss. The door has a full 90 degrees opening and makes access and removal of the included galvanised steel liner much easier. The hinge system is a full length pivoted steel rod and is very reliable even after thousands of openings and closures.

Each bin is supplied as standard with a pre-drilled base which allows the bin to be securely ground fixed using RAWL bolts. If you require the RAWL bolts, please mark the checkbox above.

A wide range of options such as ashtrays and peaked lids are available to customise the bin to your exact requirements. Please see the following pages for more information on the available options.

The Barnsley litter bins come with a 10 year anti-perforation warranty as standard.
This guarantees the surface of the bins from rusting through completely.

Powder Coated Colours

The Barnsley litter bins are powder coated in one of our standard colours free of charge. If you require a colour that is not among our standard colours, please contact us as more colours may be available upon request.

Black

Turquoise

Dark Blue

Red

Orange

Light Blue

Yellow Green

Silver

Green

Magenta

Grey

Vinyl banding is available in gold or silver and gives the bin a classic Victorian style appearance. This is a popular choice with heritage sites and town centres. The banding is available with any colour.

Please note these colours offer an approximation only and should not be used as an exact match.

Lid Options

Standard Lid

The standard lid has a slightly kinked raised lid to allow rainwater to run off.

Slight Peaked Lid

The slight peaked lid is 65mm high and has been designed with the aim of discouraging anti-social behaviour by not allowing people to sit on top of the bin or place rubbish on the top.

High Peaked Lid

The high peaked lid is 120mm high and has been designed with the aim of discouraging anti-social behaviour by not allowing people to sit on top of the bin or place rubbish on the top.

Please note slight peaked and high peaked lids are only available on the Barnsley Mark 2 litter bin

Text & Artwork Options

Bins come as standard with 2x vinyl words, one to the front and one to the back of the bin. Just select the word you require from the Text & Artwork option. The vinyl text is available in either gold or silver.

The option to upgrade to laser cut text is available and this includes either a gold or silver backing plate.

LITTER

185mm x 40mm

**LITTER
&
DOG WASTE**

325mm x 95mm

RECYCLING

328mm x 40mm

130mm x 105mm

YSIBWRIEL

269mm x 40mm

Please note the standard font height is 40mm unless the length of the word exceeds the width of the product, then the font height will be 30mm.

Laser cut text will be segmented as shown above, where a central area needs to be retained, for example the centre of an 'o'.

Bespoke lettering is available upon request. Please contact us to discuss your requirements.

Smoking & Gum Options

Stainless Steel Stubber Plate

Designed to encourage smokers to use it to stub out their cigarettes and cigars instead of using the bin and leaving unsightly marks on it.

Easyfit Ashtray

The circular Easyfit ashtray is factory fitted and features a spring loaded butterfly bottom for quick emptying into the liner below.

Standard Ashtray

The Standard ashtray is factory fitted and features a counter-balance emptying system with a recessed drop area for cigarette and cigar butts.

Both ashtray options are available in gold or silver and can be optioned with the stubber plate

Gum Chute

The Gum Chute is designed to encourage correct disposal of chewing gum.

Optional Extras

Anti-Fly Poster Dimples

Dimples to all sides of the bin to prevent posters being applied.

Bird Flaps*

Flaps help to prevent birds and squirrels getting inside the bin.

*Available upon request only

Advertising Frame*

Advertising frames can be added to allow posters to be displayed. The artwork is interchangeable by unclipping the sides of the frame and can be done quickly and easily.

Advertising frames are available in A4 or A3 sizes.

*Available upon request only

Ground Fixing Options

Set of 4 RAWL Bolts

The Middlesbrough litter bins are supplied with a pre-drilled base allowing secure ground fixing using RAWL bolts.

Ground Anchor Feet

Ground Anchor Feet enable a bin to be sited into freshly laid concrete. The feet are supplied loose with the bin and bolt to the bottom of a bin. Once the concrete cures the bin is secured in place.

Concrete Base*

A concrete slab is either bolted to the base of the bin or fitted inside. This concrete slab weights the bin down and is ideal for areas where ground fixing is not an option.

*Price varies depending on model of bin. Please contact us to discuss.
