

Double Never Rust Recycling Bin

Product Code: BS-WY-NR2R

Height	980mm
Width	885mm
Depth	476mm
Capacity	224 Litres
Weight	45 kg

The Double Never Rust recycling bin has twice the capacity of the standard Never Rust Recycling Bin and is widely used throughout the United Kingdom and is a popular choice with councils and local authorities. It is especially popular in coastal areas as Glass Fibre Composite (GFC) is unaffected by extreme temperature changes or by salt water so will therefore not corrode when located close to the sea. It is also environmentally friendly with 65% of its construction coming from renewable sources.

The bin features two coloured recycling apertures with WRAP iconography and is supplied with twin 112 litre galvanised steel liners. The unit features a front opening hinged door fitted with a budget lock as standard with the option to upgrade to a slam lock available. Slam lock is a stainless steel lock which is easily opened using a square T key and closes with a push of the door against a spring loaded boss.

Finishes & Colours

The GFC litter bins are available with a choice of either a textured, smooth or Victoriana finish.

Textured Finish - Uses PTX textured paint to give a rough finish not too dissimilar to sand paper and designed to prevent unwanted graffiti and posters being applied to the bin.

Smooth Finish - Uses a smoother pseudo-cast iron finish with only a slight texture and no roughness.

Victoriana Finish - Uses the smooth finish with only a slight texture and no roughness with the addition of highlighted beading to give a classic Victorian style appearance. The Victoriana finish is a popular choice for heritage sites and town centres.

Textured Colours

Smooth

British Racing Green

Dark Blue

Slate Grey

Black

Ground Fixing Options

Set of 4 RAWL Bolts

The Middlesbrough litter bins are supplied with a pre-drilled base allowing secure ground fixing using RAWL bolts.

Ground Anchor Feet

Ground Anchor Feet enable a bin to be sited into freshly laid concrete. The feet are supplied loose with the bin and bolt to the bottom of a bin. Once the concrete cures the bin is secured in place.
