

Fire Retardant GRC Semi Open Litter Bin

Product Code: WYRLA1GRC

Height	940mm
Width	915mm
Depth	483mm
Capacity	154 Litres
Weight	150 kg

The fire retardant GRC litter bin is ideal for use in parks and green spaces as it has a large capacity and is extremely tough and durable. It uses alkaline resistant fibres and concrete to provide excellent vandal resistant properties with a higher degree of fire protection compared to any other litter bin currently available.

The bin has been designed with a narrow profile and features a front opening fitted with twin budget locks and this allows quick access to the twin galvanised steel liners inside. The bin features a moulded 'LITTER' plate on the front of the bin highlighted in gold.

The unit is supplied with a pre-drilled base and can be securely bolted to the ground using the optional set of 4 RAWL bolts. Alternatively, ground anchor feet are available if the bin is to be sited into freshly laid concrete. The feet bolt to the bottom of the bin.

Finishes & Colours

The GFC litter bins are available with a choice of either a textured or smooth finish and finished in a choice of colours.

Textured Finish - Uses PTX textured paint to give a rough finish not too dissimilar to sand paper and designed to prevent unwanted graffiti and posters being applied to the bin.

Smooth Finish - Uses a smoother pseudo-cast iron finish with only a slight texture and no roughness.

Ground Fixing Options

Set of 4 RAWL Bolts

The Middlesbrough litter bins are supplied with a pre-drilled base allowing secure ground fixing using RAWL bolts.

Ground Anchor Feet

Ground Anchor Feet enable a bin to be sited into freshly laid concrete. The feet are supplied loose with the bin and bolt to the bottom of a bin. Once the concrete cures the bin is secured in place.
