

Anti-Vandal Litter Bin

Product Code: WYSTS2AV

Height	870mm
Width	510mm
Depth	510mm
Capacity	112 Litres
Weight	85 kg

The Anti-Vandal litter bin is based on our wooden litter bin, but in place of timber slats, features galvanised steel slats welded onto a galvanised steel frame. This creates a heavy duty litter bin that offers excellent strength and durability and this makes it ideal for locating in areas that pose a higher threat of vandalism, such as schools, colleges, parks and green spaces.

A galvanised steel liner collects the litter and a front opening door allows quick and easy access to the liner for emptying. The curved top of the bin has been designed to discourage anti-social behaviour by preventing people from sitting on or putting litter on the top of the bin.

The galvanised steel frame and slats are powder coated in one of our standard colours. If you require a colour that is not among our standard colours, please give us a call as other colours may be available upon request.

The feet come pre-drilled ready for ground fixing using RAWL bolts or the bin can be supplied with extended legs (extended by 300mm) for concreting directly into the ground.

Colour Options

The Anti-Vandal litter bins are powder coated in one of our standard colours free of charge. If you require a colour that is not among our standard colours, please contact us as more colours may be available upon request.

Please note these colours offer an approximation only and should not be used as an exact match.
