The IKP 1215 pallets are available in two versions and are manufactured from regenerate High Density Polyethylene (HDPE). The pallets are extremely robust, dimensionally stable and secure for high load capacities. The pallets are used in a wide range of locations such as:

Retail/Market Chains

Chemicals/Pharmaceuticals/
Cosmetics

Logistics

Packaging

Please note these pallets are not suitable for use in food industries as they are manufactured from recycled material.

Pallet Features

Manufactured from regenerate HDPE plastic

Pallet Colour - Black

Open runner system with 5x non-welded runners

7mm anti-slip edges

Stable at temperatures ranging from -30°C - +60°C

Excellent cleaning properties

5000 kg static load carrying capacity*

1000 kg dynamic load carrying capacity*

400 kg limit when used in a racking system*

***Static Load** - The pallet is in contact with a level floor and has an evenly distributed load

***Dynamic Load** - The pallet is picked up by a forklift truck on either the long or short side and has an evenly distributed load

***In a Racking System** - The pallets stand on the short side of the runners or the long sides of the runners, level for 100 hours with an evenly distributed load.
