

Koi Carp Holding Tanks

These high quality temporary koi carp vats are manufactured in the UK using high grade, 1mm thick PVC coated polyester joined using specialised RF plastic welding techniques to give leak free welded seams.

This material is manufactured for safe use with fish and unlike other PVC tanks currently on the market, it does not contain Vinizane which is harmful to fish.

The improved design of the tanks allow easier assembly of the top ring by using nickel plated press studs to hold the top ring in position and it also makes it easier to insert the legs.

Each tank is supplied with assembly instructions with a picture guide.

The tank can easily be folded away when not in use.

Available in a range of sizes

Product Code	Capacity	Height	Diameter
SK450	450 Litres	600mm	1000mm
SK700	700 Litres	1000mm	1000mm
