

Torpedo Single

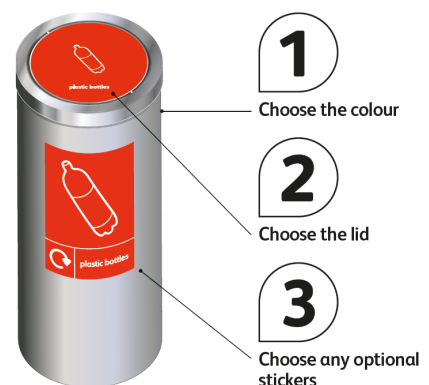

The Torpedo is a single recycling unit with a sack retaining lift-off swing lid featuring WRAP iconography to denote the waste stream being collected in the bin.

These galvanised steel units are perfect for locating in offices, schools, cafeterias etc and look great when grouped together to form a recycling station and they are available in three sizes. A weighted swing lid provides better fire protection and also helps to contain any unpleasant odours.

We also offer a full range of waste recycling artwork to match your lid choice. The artwork is applied to the front of the bin and clearly indicates which waste stream is being collected.

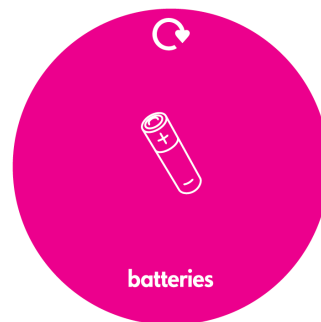

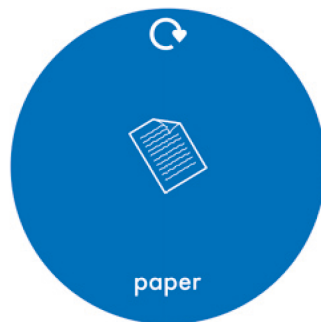

The bins are supplied as standard without a liner, however a galvanised liner is available as an optional extra.

	Torpedo Small	Torpedo Medium	Torpedo Large
Height	700mm	800mm	900mm
Diameter	360mm	360mm	360mm
Weight	10 kg	12 kg	14 kg
