

# Box Cycle Triple

The triple version of the Box Cycle is designed for internal use inside offices, schools, nurseries etc. and can be used for the collection of three individual waste streams.

The transparent body is designed to help prevent cross contamination of waste streams by allowing users to see the contents of the bin. The transparent body is manufactured from robust polycarbonate plastic. The body is also available with a silver epoxy powder coated finish. Both finishes feature high corrosion and abrasion resistance and they are also fire retardant. The powder coated finish is ideal for hiding unsightly waste streams such as food waste. Please note If the silver body is selected the base will also be finished in the same colour.

The bin features three removable sack retaining lids in a choice of colour to match the waste stream you require. The General Waste, Other Waste and Food Waste lids are only available with the silver powder coated body.

Dimensions	60 Litre	80 Litre
Height	700mm	850mm
Width	960mm	960mm
Depth	320mm	320mm
Weight	25 kg	27 kg

# Body Materials

The transparent body is designed to help prevent cross contamination of waste streams by allowing users to see the contents of the bin.

A epoxy powder coated galvanised steel in silver. The powder coated finish is ideal for hiding unsightly waste streams such as food waste.

\*Both finishes feature high corrosion and abrasion resistance and are fire retardant

# Lid Options

A large choice of sack retaining lids is available with apertures to suit the recycling stream chosen.

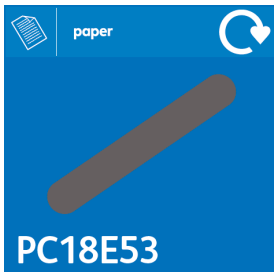

\*The above three lid choices are only available with a powder coated body

**Liquid Collection Tube**

Please note if you select the 'Other Waste' lid with liquid collection, you will also require the liquid collection tube.

## Optional Extras

**Locking Lid**

Add a push lock for added security. Ideal for confidential lids.

**Message Board**

A message board can be added to the Box Cycle and this can be used to display vinyl stickers, magnetic labels or our optional poster frames.

**Advertising Frames**

Advertising frames can be added allowing posters to be displayed. The artwork can be changed easily by un-clipping the sides of the frame.

# Artwork

A4 (210 x 297mm) vinyl stickers positioned on the front of the body to make your waste stream visible.
